You have seen pharmaceutical advertising in doctor's offices on everything from tissues to note pads. Well, this one should get the prize...

We emailed it to a Chinese doctor friend. He emailed back: "If the light stays on for more than 4 hours, call your erectrician."

Chickpeas can only  
Hummus one.

**HOW TO WALK A HUMAN**  
*A Dogs Guide*

Humans need exercise. If they don't get it they become "chubby". It's up to you to save them.

1. Allow your human to tether themselves to you. This keeps them from wondering off or running away.
2. Your human probably needs breaks. Be considerate and stop and sniff often.
3. Bark frequently. Humans have a short attention span.
4. When you go to the bathroom, walk away. If you have trained your human correctly, they will pick it up. Good aerobics.
5. Periodically drag your human as fast as you can. This is called interval training.
6. Do not allow your human to shorten the walk. They are being lazy. Sit in protest if you must.
7. Once you are home, allow your human to remove their tether, then lick their face many times. This is positive reinforcement for a job well done.
